ACMSS0000X5	Large Animal Incident Responder Skill Set

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 3.0.

Description
This skill set reflects the work required to safely participate in a team responding to a large animal incident involving lifting operations and potentially complex technical rescues of large animals from a variety of situations. It applies to large animals, typically horses, cattle and sheep, and other domesticated animals that require at least two people to lift or move.

Pathways Information
These units of competency provide credit towards:
• ACM4XX19 Certificate IV in Animal Control and Regulation.

Licensing/Regulatory Information
No occupational licensing or regulatory requirements apply to this skill set at the time of publication.

Skill Set Requirements
• ACMAIMXX2 Participate in a team responding to an incident involving large animals
• ACMAIMXX3 Use manual techniques to safely move compromised large animals
• ACMAIMXX4 Perform technical large animal rescues

Target Group
This skill set is for individuals who work or volunteer in a team responding to a range of potential large animal incidents requiring complex technical rescue techniques.

Suggested words for Statement of Attainment
These competencies from the *ACM Animal Care and Management Training Package* meet the industry requirements for people who conduct technical and complex rescues in large animal incident response teams.
