FBPCEL3008	Operate the rotary vacuum filtration process	
Application	This unit of competency describes the skills and knowledge required to prepare and operate the rotary vacuum filtration process to filter juice product or wine.	
	The unit applies to individuals who work in wine or beverage production and take responsibility for their own work using discretion and judgement in the selection and use of available resources.	
	All work must be carried out to comply with workplace procedures, according to state/territory health and safety, and food safety regulations, legislation and standards that apply to the workplace.	
	No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.	
Prerequisite Unit	Nil	
Unit Sector	Cellar Operations (CEL)	

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
Prepare the rotary	1.1 Identify and confirm production requirements
vacuum filtration process for operation	1.2 Confirm availability and prepare product and materials to meet filtration requirements
	1.3 Confirm environmental guidelines and identify potential health and safety in the workplace hazards and controls in accordance with workplace
	procedures
	1.4 Select, fit and use personal protective equipment according to job requirements
	1.5 Confirm availability and prepare product and materials are available and ready for operation
	1.6 Check equipment to confirm readiness for use according to workplace procedures
	1.7 Set the process to meet filtration requirements and job requirements
2. Operate and monitor the rotary vacuum filtration	2.1 Start up the rotary vacuum filtration process according to workplace procedures
process	2.2 Monitor rotary vacuum filtration process to confirm the filtration meets specification
	2.3 Identify and address non-conformance product, process and equipment
	performance
3. Shut down the rotary	3.1 Identify and implement appropriate shutdown procedures
vacuum filtration process	3.2 Dismantle equipment safely and prepare for cleaning
	3.3 Collect, treat and dispose of or recycle waste generated by both the
	rotary vacuum filtration process and cleaning procedures
	3.4 Record workplace information according to workplace procedures

Foundation Skills			
	language, literacy, numeracy and employment skills that are essential for empetency but are not explicit in the performance criteria.		
Skill	Description		
Reading	Comprehend instructions in workplace documents		
Writing	Complete workplace documents in required format		
Numeracy	Perform calculations relating to measurements, quantities and operational specifications		
	Interpret symbols and numbers during monitoring of process		
Navigate the world of work	Apply workplace procedures and legislative responsibilities to own role		
Interact with others	Use required communication mode to report operational information to relevant personnel		
Get the work done	Plan, sequence and implement tasks according to set routines and procedures		
	Problem solve issues as they arise

TITLE	Assessment requirements for FBPCEL3008 Operate the
	rotary vacuum filtration process

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has demonstrated the following on at least one occasion:

- accessing workplace information to identify filtration requirements
- selecting, fitting and using personal protective equipment
- checking supply and status of materials before commencing filtration process
- preparing and confirming status of equipment before commencing rotary vacuum filtration process including checking the screen or cloth condition and receival vessels
- · setting up and starting up the rotary vacuum filtration process
- monitoring rotary vacuum filtration process
- taking corrective action in response to non-conformance results
- shutting down the process after filtration operations are completed
- conducting work according to environmental and health and safety requirements.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- purpose and principles of rotary vacuum filtration and links between rotary vacuum filtration and other process in cellar operations
- stages and changes which occur during rotary vacuum filtration and the effect of process stages on the end product
- use of filter media:
 - diatomite
 - perlite
 - cellulose
 - polyethylene
- methods used to monitor the filtration process and common causes of non-conformance and corrective action required
- routine shutdown preparation requirements
- · health and safety hazards and controls in the workplace
- · workplace procedures and responsibility for:
 - reporting problems
 - environmental issues and controls
 - waste handling requirements
 - · recording requirements.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- · physical conditions:
 - a wine or beverage production workplace or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - personal protective equipment for rotary vacuum filtration operations
 - equipment and materials for rotary vacuum filtration process
 - products for rotary vacuum filtration
 - system for recording and reporting information
- specifications:
 - workplace procedures for rotary vacuum filtration operations.

Assessment Conditions

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
