

## Modification history

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture, Conservation and Land Management Training Package Version 5.0.
Release 1	Initial release

<b>AHCSOL404</b>	<b>Supervise acid sulphate soil remediation and management projects</b>
<b>Application</b>	<p>This unit of competency describes the skills and knowledge required to plan and supervise acid sulphate soil (ASS) remediation and management projects.</p> <p>The unit applies to individuals who apply specialist skills and knowledge to supervising ASS remediation and management projects. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.</p> <p>All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.</p> <p>No licensing, legislative or certification requirements apply to this unit at the time of publication.</p>
<b>Prerequisite Unit</b>	Nil
<b>Unit Sector</b>	Soils and media (SOL)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan implementation	1.1 Review and relate ASS management plan, work schedule and specifications to the worksite 1.2 Plan and record work sequences in line with work schedule 1.3 Maintain compliance with relevant consent authority standards, environmental legislation and industry guidelines
2. Carry out environmental site induction	2.1 Communicate specific site workplace health and safety and environmental issues to stakeholders 2.2 Describe and communicate project objectives and duty of care responsibilities to stakeholders 2.3 Brief plant operators, contractors and other staff on special aspects of performance relating to using specific equipment and handling hazardous materials 2.4 Determine monitoring requirements for the site and identify individual responsibilities as stated in ASS management plan
3. Direct implementation of planned works	3.1 Monitor work according to ASS management plan 3.2 Maintain compliance with ASS management plan, work schedule, specifications and regulatory requirements 3.3 Implement contingency procedures
4. Review works and site environment	4.1 Review works and site environment to ensure outcomes are in accordance with the ASS management plan, work schedule and specifications 4.2 Provide instructions to staff and contractors 4.3 Make changes to works in consultation ASS management plan provider

<b>Foundation Skills</b>	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
<b>Skill</b>	<b>Description</b>
Reading	<ul style="list-style-type: none"> <li>Interpret textual information from a range of sources to identify relevant and key information on ASS management plan, work schedule and specifications, and relevant consent authority standards, environmental legislation and industry guidelines for ASS management</li> </ul>
Writing	<ul style="list-style-type: none"> <li>Recorded work sequences</li> </ul>
Oral communication	<ul style="list-style-type: none"> <li>Initiate discussions with stakeholders, plant operators, contractors and staff, using clear language to describe and communicate ASS management plan</li> <li>Use clear language to discuss changes to works with ASS management plan provider</li> </ul>
