ACMSSXXX28 Exhibited Animal Population Management Skill Set

ACMSSXXX28	Exhibited Animal Population Management Skill Set

Modification History

Release	Comments
Release 1	This version released with ACM Animal Care and Management Training Package Version 4.0.

Description
This skill set is designed to prepare individuals for higher level roles managing a facility's exhibited/captive animal population to address wildlife conservation, species recovery and broader regional plans.

Pathways Information
These units provide credit towards some Business Services (BSB) qualifications.

Commented [RF1]: Should this provide credit to some Animal Management Care qualifications?

Licensing/Regulatory Information
No licensing, legislative or certification requirements are known to apply to this skill set at the time of publication.

Skill Set Requirements
- ACMCAN401 Implement collection management
- ACMCAN502 Contribute to collection management planning and policy
- BSBRES411 Analyse and present research information

Target Group
This skill set is for individuals who are working in senior keeper/carer/aquarist roles with responsibilities for managing small populations of animals and contributing to facility and regional population planning.

Suggested words for Statement of Attainment
These competencies meet industry requirements related to managing populations in a zoo, wildlife park, aquarium or other exhibited/captive animal facility.
