Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 6.0.

FWPFGM3XXX	Fall trees manually (advanced)
Application	<p>This unit of competency describes the skills and knowledge required to assess, plan and safely carry out manual felling of advanced trees using a chainsaw.</p> <p>This unit covers the felling procedures for advanced trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.</p> <p>Individuals competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.</p> <p>Trees typical to the scope of this unit may have the following characteristics:</p> <ul style="list-style-type: none"> • lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements • large trees with a diameter up to 2.5 times the chainsaw guide length bar • substantial lean • damage or defect that requires complex felling techniques • multi-legged, hollow butts, culls and stags • species prone to free splitting and adverse reactions during felling • complex multi-stems • terrain, slope and environment that can add significant complexity to the operation • lean in a direction away from the fall zone; or side-leaning to the available fall zone <p>The unit applies to individuals who fell advanced trees as part of arboriculture, forestry, agriculture, conservation and land management, local government, emergency services and other government agency operations. With the exception of minor forest produce, this unit does not apply to commercial harvesting operations.</p> <p>All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.</p> <p>No licensing, legislative or certification requirements apply to this unit at the time of publication.</p>
Prerequisite Unit	FWPCOT2239 Trim and cut felled trees or equivalent
Unit Sector	Forest Growing and Management

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for felling	<p>1.1 Review work order or instruction to determine job requirements and, where required, seek clarification from appropriate personnel</p> <p>1.2 Review workplace health and safety procedures, including the use of personal protective equipment, operation and maintenance of chainsaws, equipment lock-out and safe manual handling techniques</p> <p>1.3 Identify, assess and take actions to mitigate risks and hazards associated with felling advanced trees</p> <p>1.4 Identify workplace environmental protection procedures for felling advanced trees, minimising and disposing of waste material, cleaning tools and equipment, and minimising impact of tree felling on environmental assets</p> <p>1.5 Consult and maintain communication with team members and other appropriate personnel to ensure that work is coordinated effectively with others in the workplace</p> <p>1.6 Obtain tools and equipment needed for the work and check for correct operation and safety</p> <p>1.7 Identify, assess and determine felling requirements of trees to be felled according to work order or instruction.</p>
2. Visually assess site conditions and surroundings	<p>2.1 Inspect site for conditions likely to affect safe implementation of felling activities</p> <p>2.2 Identify and report site environmental conditions to appropriate personnel</p> <p>2.3 Determine fall zone and implement control measures to minimise risks and hazards in the zone according to safe work procedures</p> <p>2.4 Monitor location and activity of other personnel on the work site and implement control measures according to workplace safety procedures</p>
3. Visually assess tree and plan felling	<p>3.1 Visually assess tree for felling characteristics</p> <p>3.2 Confirm tree is safe to fell</p> <p>3.3 Assess trees and site to determine complexity of felling requirements</p> <p>3.4 Assess and progressively plan tree-felling sequence for individual trees</p> <p>3.5 Assess and check required falling direction and possible deviation</p> <p>3.6 Plan sequence of cuts to fell tree according to standard felling procedures</p> <p>3.7 Plan and install suitable pulling rope(s) to control tree fall if required and suitable for site and tree</p> <p>3.8 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required</p> <p>3.9 Monitor and exclude location and activity of other personnel on the work site</p>
4. Apply tree-felling techniques	<p>4.1 Identify suitable escape routes and clear growth and other obstacles according to environmental care principles and workplace procedures</p> <p>4.2 Fell individual trees using planned techniques according to current Australian Standards and industry codes of practice at a safe distance from other personnel in the work area</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall and monitor the fall of the tree until all movement has stopped</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen or is stable enough to allow safe access back into the felling area</p> <p>4.6 Identify and implement procedures for removal of trees that are hung-up if safe to do so</p> <p>4.7 Dispose of waste materials according to environmental and operational requirements</p>

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Maintain chainsaw and cutting attachments	5.1 Follow workplace health and safety procedures and manufacturer instructions to lock out equipment 5.2 Inspect chainsaw on completion of cutting activities 5.3 Identify damage to chainsaw and cutting attachments and tag for repair, service or replacement according to workplace requirements and manufacturer recommendations 5.4 Remove, clean, adjust or replace chain and other components according to workplace requirements and manufacturer recommendations 5.5 Maintain chainsaw and cutting attachments according to workplace and manufacturer requirements

Foundation Skills	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
Skill	Description
Reading	<ul style="list-style-type: none"> Read workplace documentation and correctly identify work requirements
Writing	<ul style="list-style-type: none"> Complete accurate basic records for tree felling process, equipment faults and maintenance requirements
Oral communication	<ul style="list-style-type: none"> Select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees Interpret hand signals with other operators to ensure safe tree felling
Numeracy	<ul style="list-style-type: none"> Complete routine calculations and report on size, length, diameter of felled trees

TITLE	Assessment requirements for FWPFGM3XXX Fall trees manually (advanced)
Performance Evidence	
<p>An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.</p> <p>There must be evidence that the individual has:</p> <ul style="list-style-type: none"> assessed, planned and conducted the felling of six advanced trees following a work order or instruction workplace policy and procedures and current workplace health and safety legislation and regulations. In completing this work, the individual must demonstrate that, for each tree, the falling technique was consistent with current Australian Standards and industry codes of practice applicable to tree felling operations. inspected and carried out routine maintenance on one chainsaw and its cutting attachments on one occasion according to manufacturer requirements. 	

Knowledge Evidence	
<p>An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:</p> <ul style="list-style-type: none"> Australian Standards and codes of practice applicable to tree falling operations characteristics of advanced trees workplace health and safety requirements including: <ul style="list-style-type: none"> personal protective equipment (PPE) and clothing safety equipment first aid equipment firefighting equipment hazard and risk control procedures fatigue management procedures appropriate signage elimination of hazardous materials and substances procedures safe forest practices, including required actions relating to fire techniques for manual handling, including shifting, lifting and carrying types and purposes of cuts to fell trees, including scarf cutting and back cutting using different methods to provide hinge-wood and wedges to maintain control of tree typical tree defects and how these affect tree felling activities: <ul style="list-style-type: none"> shakes insect defects knots and resin pockets pipe drysides biomechanical defects including: splits, hazard beams and heartwood rot. Identifying trees: <ul style="list-style-type: none"> that contain hazards and are deemed unsafe to fell considered outside own skill level trees where cuts made may lead to loss of control of tree in felling hazards and related risks and the impact on felling trees of: <ul style="list-style-type: none"> uneven and unstable terrain unsafe trees fires overhead and underground services excavations traffic structures hazardous materials insects and animals other personnel and machinery methods used to remove trees that are hung up and procedures for removal methods for assessing chain condition 	

Knowledge Evidence
<ul style="list-style-type: none"> • environmental protection measures suitable for a worksite where tree felling operations are performed: <ul style="list-style-type: none"> • noise control • protection of flora, fauna and habitat • protection of soil • protection of water • disposal, recycling and reuse of waste • cleaning of plant, equipment and tools • protection of adjacent land uses and fixed assets • vehicle control • access restrictions • fire prevention • protection of cultural heritage • hazard control measures suitable for a worksite where tree felling operations are performed related to: <ul style="list-style-type: none"> • trees and other vegetation • ground conditions • noise • fire and other emergency situations • vehicle and traffic access • foot access • plant, tools and equipment • weather conditions • adjacent land uses • dangerous goods • the types, safe use, operation and maintenance of chainsaws, including: <ul style="list-style-type: none"> • chainsaw • safety features of chainsaws including hand guard and chain brake • cutting attachments • maintenance requirements • support tools.

Assessment Conditions
<p>Assessment of the skills in this unit of competency must take place under the following conditions:</p> <ul style="list-style-type: none"> • physical conditions <ul style="list-style-type: none"> • skills must be demonstrated in a workplace location or an environment that accurately represents workplace conditions • resources, equipment and materials: <ul style="list-style-type: none"> • chainsaw and accessories • suitable trees to fell • tools and equipment to fell trees • PPE required in tree felling operations • communication system • specifications <ul style="list-style-type: none"> • access to work order or instruction detailing tree felling operations to be carried out by operator • access to workplace policies and procedures which cover current Work Health and Safety Acts or Occupation Health and Safety Acts, regulations and related industry standards and codes of practice applicable to tree felling and chain saw operations • access to workplace policies and procedures which cover off on current Environment Protection Acts, regulations and related industry standards and codes of practice applicable to tree felling operations • access to workplace safety and environmental protection plans • access to site emergency procedure • access to workplace standard operating procedures or operator manual for chain saws. <p>Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.</p>
