AHCDSE503	Assess landscape sites
Application	<p>This unit of competency describes the skills and knowledge required to collect and collate initial information, conduct a landscape site assessment and document a site report develop recommendations.</p> <p>The unit applies to individuals who apply specialist skills and knowledge to surveying and establishing site levels, take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information, and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of sometimes complex problems.</p> <p>-All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.</p> <p>No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.</p>
Prerequisite Unit	Nil
Unit Sector	Design (DES)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Collect and collate initial information	1.1 Consult with client to and confirm objectives of assessment 1.2 Source and verify site plans and maps 1.3 Identify and collect acquire required resources for site assessment 1.4 Prepare base plan of the site and relevant surrounds 1.5 Verify location, ownership and site boundaries 1.6 Identify and record current land use and environmental threats and problems 1.7 Identify and record covenants that could affect the project, design or report 1.8 Determine climate and weather conditions from historical data
2. Undertake initial site visit	2.1 Meet site entry conditions and obtain approval where if required 2.2 Identify site hazards and assess risks associated with site for current visit according to workplace health and safety procedures 2.3 Undertake site orientation 2.4 Identify and record existing on-site and adjacent site features that may impact upon the project, plan or report objectives 2.5 Identify, and measure , and record or confirm site dimensions, levels and gradients

AHCDES503 Assess landscape sites

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
3. Compile a site inventory	3.1 Identify soil and growing media types, properties and relevant physical characteristics and record on-site inventory 3.2 Record the species, health, age and location of vegetation 3.3 Locate structural elements and confirm existing services and facilities 3.4 Record the presence, location and extent of other relevant site constraints 3.5 Sample areas of homogeneous soils and growing media to send for testing and analysis of soil content and contamination as requested by <u>according to client or as required in the brief provided</u>
4. Determine the impact of development for trees on site	4.1 Obtain the consulting arborist report to assess trees on site 4.2 Determine and record tree protection zones 4.3 Document the impact of proposed development on each tree 4.4 Identify trees that are exempt from approval requirements 4.5 Identify and locate on the site plan trees impacted by development, according to regulations applying in the local jurisdiction 4.6 Include trees identified by the consulting arborist report as requiring pruning or removal in a development application
5. Document a site assessment report	5.1 Interpret soil and growing media tests results and analyse for further testing requirements 5.2 Record specific recommendations of remedial action for site problems 5.3 Formulate recommendations for appropriate risk controls of site hazards <u>according to workplace health and safety procedures</u> 5.4 Store and maintain survey and assessment data 5.5 Document site information 5.6 Incorporate all relevant data into the assessment report in accordance to with client brief needs and legislative and regulatory the requirements of relevant legislation and regulations 5.7 <u>Document and present assessment eliver a copy of the report to the client and advise the client of content and implications of the report</u>

AHCDES503 Assess landscape sites

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
Oral communication	<ul style="list-style-type: none"> Initiate discussions with client, using clear language to discuss and confirm assessment objectives and present assessment report

TITLE	Assessment requirements for AHCDSE503 Assess landscape sites
Performance Evidence	
<p>An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit. There must be evidence that the individual has assessed a landscape site on at least one occasion and has:</p> <ul style="list-style-type: none"> • consulted and advised clients • collected and collated information on site features • consult with and advise clients • document assessment and recommendations in a site plan and assessment report • applied relevant workplace health and safety and environmental and biosecurity legislation, regulations and workplace procedures • identified vegetation and soils • interpreted and produced plans • maintained assessment data records • sampled soils and growing media • verified existing site details • documented assessment and recommendations in a site plan and assessment report. 	
Knowledge Evidence	
<p>An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:</p> <ul style="list-style-type: none"> • principles and practices of assessing landscape sites, including: <ul style="list-style-type: none"> • current land use and environmental threats, to and problems with site • interpretation of results from assessment and testing • local, state and federal regulations relevant to assessing landscape sites • measurement and surveying techniques • plant nutrition • protocols of site access • soil and growing media types, structure, texture and soil pH • soil chemical and physical properties • soil field tests and soil sampling techniques • techniques to ameliorate soil properties • vegetation common within the region, using botanical and regionally accepted common names, age, health and conditions of vegetation • workplace health and safety and environmental and biosecurity legislation and regulations and workplace procedures relevant to assessing landscape sites 	
Assessment Conditions	
<p>Assessment of the skills in this unit of competency must take place under the following conditions:</p> <ul style="list-style-type: none"> • physical conditions: <ul style="list-style-type: none"> • a workplace setting or an environment that accurately represents workplace conditions • resources, equipment and materials: <ul style="list-style-type: none"> • landscape site • site information and data applicable to sustainable landscape design • resources for assessing site, including soil and growing media testing tools and equipment • specifications: <ul style="list-style-type: none"> • workplace health and safety and environmental and biosecurity legislation and regulations and workplace procedures applicable to assessing landscape sites • relationships: <ul style="list-style-type: none"> • clients • timeframes: <ul style="list-style-type: none"> • according to job requirements. 	

Formatted

AHCDES503 Assess landscape sites

Assessment Conditions

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
