AHCLSC304	Erect timber structures and features
Application	<p>This unit of competency describes the skills and knowledge required to erect timber structures and features as a component of landscape project works, including preparing for work, setting out and preparing site, preparing and cutting timber components, assembling and erecting structure, checking and cleaning up site.</p> <p>This unit applies to individuals who erect timber structures and features under broad direction, and take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.</p> <p>No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.</p>
Prerequisite Unit	Nil
Unit Sector	Landscape (LSC)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare work	1.1 Interpret site plans and specifications 1.2 Identify potential hazards and risks, and implement safe working practices to manage risks Check the quantity and quality of materials to ensure they conform to design drawings and specifications 1.3 Check the quantity and quality of materials Select tools and equipment and check for serviceability 1.4 Select tools and equipment required for construction work and check for safe operation Identify hazards, assess risks and implement controls accordingly 1.5 Select, fit, and use and maintain suitable personal protective equipment (PPE) applicable to the task
2. Set out the site and prepare the profile and footings	2.1 Determine, and locate and mark out services from site plan 2.2 Mark out the position of the structure or feature according to design drawings and specifications 2.3 Establish profiles to conform to the nominated tolerances 2.4 Excavate and prepare footings according to the type of structure to be erected
3. Prepare and cut timber components	3.1 Prepare components for assembly 3.2 Mark out the length of components and the positions of cuts and joints 3.3 Cut, check and accurately drill components in preparation for joining and assembly
4. Assemble and erect structure	4.1 Fix, join or assemble timber components into position and fix into place 4.2 Install remaining components and fix into position 4.3 Finish off structure to ensure all components are secure and complete 4.4 Apply coatings

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure the required standard has been achieved 5.2 Clean debris from structure and site 5.3 Dispose of <u>or recycle</u> waste material <u>from the site</u> in an environmentally safe and sensitive manner 5.4 Clean, <u>maintain and</u> store and maintain tools and equipment <u>5.5 Identify and report unserviceable tools and equipment according to workplace procedures</u>

Foundation Skills	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
Skill	Description
Oral communication	<ul style="list-style-type: none"> Use clear language to report tool and equipment unserviceability

TITLE	Assessment requirements for AHCLSC304 Erect timber structures and features
Performance Evidence	
<p>An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.</p> <p>There must be evidence that the individual has erected timber structures and features on at least two occasions and has:</p> <ul style="list-style-type: none"> • applied workplace health and safety requirements • selected, used and maintained tools and equipment required for erecting timber structures and features • interpreted site plans, design drawings and specifications • set out and prepared site for timber structures and features • marked marked out a site for timber structures and features according to design drawings and specifications • apply a variety of surface finishes • established established levels and prepared footings footings where required • estimate quantities • used used levelling equipment • excavated excavated footings • fixed, joined or assembled timbers using a variety of recognised methods • used a used power tools efficiently and safely • applied surface finishes • checked quality of work and cleaned up site • reported unserviceable tools and equipment. 	

Knowledge Evidence	
<p>An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:</p> <ul style="list-style-type: none"> • workplace requirements applicable to health and safety in the workplace for erecting timber structures and features, including appropriate use of personal protective equipment (PPE) • the principles and practices for erecting timber structures, including: <ul style="list-style-type: none"> • common timber joins • levelling principles and techniques • footings for timber structures and their construction methods • timber fixing and joining methods and products • timber timber properties and characteristics • surface finishes. 	

Assessment Conditions	
<p>Assessment of the skills in this unit of competency must take place under the following conditions:</p> <ul style="list-style-type: none"> • physical conditions: <ul style="list-style-type: none"> • a workplace setting or an environment that accurately represent workplace conditions • resources, equipment and materials: <ul style="list-style-type: none"> • workplace procedures applicable to erecting timber structures and features • materials, tools and equipment applicable to erecting timber structures and features • PPE applicable to erecting timber structures and features • specifications: <ul style="list-style-type: none"> • workplace requirements applicable to health and safety in the workplace for erecting timber structures and features • site plans, design drawings and specifications applicable to erecting timber structures and features • timeframes: <ul style="list-style-type: none"> • according to job requirements. <p>Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.</p>
