AHCLSC203	Install aggregate paths
Application	<p>This unit of competency describes the skills and knowledge required to install aggregate paths in landscape settings, including preparing for installation, setting out the site, ground preparation, laying aggregate surface and cleaning up site.</p> <p>The unit applies to individuals who install aggregate paths under general supervision with limited autonomy or accountability.</p> <p>No licensing, legislative or certification requirements apply to this unit at the time of publication.</p>
Prerequisite Unit	Nil
Unit Sector	Landscape (LSC)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare for installation	1.1 Read work instructions relating to installation of aggregate path and confirm with supervisor 1.2 Prepare and use tools, equipment and machinery according to supervisor instructions 1.3 Check and confirm quantity and quality of materials 1.4 Identify manual handling and workplace health and safety hazards, assessed risks and report to supervisor 1.5 Select, fit, use and maintain personal protective equipment (PPE) applicable to the task 1.6 Put in place measures to avoid environmental impacts before starting work
2. Set out the site for path construction	2.1 Mark out the location of the proposed path according to site plan 2.2 Put public risk protection measures in place
3. Undertake ground preparation	3.1 Clear area of debris and excavate to base level 3.2 Relocate or dispose of soil and waste materials 3.3 Install drainage structures, where required 3.4 Place and compact base material to the required finished level 3.5 Install edge restraints, where required 3.6 Check set out work at regular intervals with supervisor, according to the site plan
4. Lay surface aggregate materials	4.1 Spread surface aggregate materials over the area to the designated depth 4.2 Screed material to ensure consistent depth of materials 4.3 Level aggregate materials to the designated level and falls 4.4 Compact aggregate materials using appropriate machinery
5. Make good the site	5.1 Dispose of or recycle soil and waste material from the site 5.2 Reinstate areas disturbed by installation works 5.3 Clean, maintain and store tools and equipment 5.4 Report work outcomes and malfunctions, faults, wear or damage of tools to supervisor

Foundation Skills	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
Skill	Description
Oral communication	<ul style="list-style-type: none"> • Use clear language and standard industry terminology to report malfunctions, faults wear or damage to tools • Participate in verbal exchanges to respond to questions and clarify information

TITLE	Assessment requirements for AHCLSC203 Install aggregate paths
--------------	--

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.
 There must be evidence that the individual has installed aggregate paths of at least two metres in length on at least two occasions and has:

- read and interpreted site plans
- applied workplace health and safety requirements
- planned and prepared for installation and site safety
- undertaken ground preparation for the path
- laid base material and surface aggregate materials
- set the path out
- reinstated site at completion of work
- reported aggregate path installation operations and unserviceable tools and equipment.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- workplace requirements applicable to health and safety in the workplace for installing aggregate paths including appropriate use of personal protective equipment (PPE)
- principles and practices of aggregate path installation, including:
 - base and aggregate materials and their performance
 - environmental impacts of soil disturbance when installing paths
 - types of machinery used in path construction
 - types of membranes
 - types of edge restraints
 - types of signs and barriers that need to be erected around the site
 - tools and equipment used for installing paths.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - a workplace setting or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - work instructions applicable to installing aggregate paths
 - materials, tools, equipment and machinery applicable to installing aggregate paths
 - PPE applicable to aggregate path installation work
- specifications:
 - workplace requirements applicable to health and safety in the workplace and installing aggregate paths
 - site plan
- relationships:
 - supervisor
- timeframes:
 - according to job requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
